

Autumn School for young scientists in the Baltic Sea region to enhance teaching skills

Date: October 7 to 11, 2019

Venue: HAW Hamburg, Germany

Are you a young researcher at the beginning of your academic career and focus on sustainable energy or are you doing your PhD on this topic? Are you located at a higher education institution in the Baltic Sea region? Do you have a solid scientific expertise/background but would like to enhance your teaching skills because you have to fulfil a teaching obligation? If all of this applies to you, we would be pleased to welcome you to our

3-day Autumn School for young scientists on the theme of sustainable energy

Young scientists and doctoral candidates often face the challenge of being available for teaching in addition to their research activities, and of taking on teaching activities such as lectures or seminars for students. In order to ensure that students receive a high-quality education that meets the needs and demands of the labour market, competent teachers with excellent teaching skills are a key requirement.

The aim of the Autumn School, therefore, is to increase the teaching skills of young scientists and doctoral candidates. In addition, the school serves to increase the mobility of young scientists in the Baltic Sea region with the aim of exchanging experiences, knowledge and best practices, both with regard to their own research topics and in the field of teaching, and to establish first contacts for future research cooperation in the field of sustainable energy.

The Autumn School will be organised by and take place at Hamburg University of Applied Sciences (Germany) from 7-11 October 2019. The core programme will take place from October 8 to 10.

The preliminary programme will include the following:

- Integrating the concept of sustainable energy into current study programmes
- A one-day workshop on the topic of teaching & learning
- A Hamburg excursion day, including a visit of the Hamburg Renewable Energy Cluster, a guided city tour, and a visit to Hamburg's energy hill and energy bunker
- A visit to HAW Hamburg's energy campus and developing a teaching module on energy transition.

Participating at the Autumn School is free of charge. Costs for meals and accommodation will be covered by the organiser. Travel costs will be reimbursed on a lump-sum basis.

Attached please find the application form. The **deadline for submitting the completed application is 15 August 2019**. Participants will be selected based on the quality of the submitted application. Applications should be sent via email to kathrin.rath@haw-hamburg.de
