

Sustainable Food Production in conditions of Climate Change

13th -16th of May 2020, Nitra, Slovakia

The Baltic University Programme

Who we are: Being innovative by its nature, the Baltic University Programme (BUP) strives since its foundation in 1991 to find novel ways of interaction and cooperation among universities by promoting openness, internationalization and mobility.

Our aim: The main aim is to support building strong regional educational and research communities. The Programme is committed to gain and disseminate knowledge in the fields of sustainable development, environmental protection, nature resources, democracy and Education for Sustainable Development (ESD). This is achieved by developing and offering university courses, conferences, support multi- and interdisciplinary research co-operations, and by participation in transdisciplinary projects.

The Baltic Sea region with its drainage basin and the locations of the 84 BUP member universities.
